What is claimed is:

1. A method of creating a religious tract, comprising:

providing a plurality of pregenerated phrases from which a religious tract can be created;

5   affiliating each of said pregenerated phrases according to at least one subject matter variable;

receiving input from a sender comprising at least one of said subject matter variables;

displaying to the sender the affiliated pregenerated phrases associated with

10   the subject matter variables; and

creating the religious tract using the pregenerated phrases selected by the sender.

2. The method of claim 1, further comprising receiving a selection from the sender

15   selecting one of said displayed pregenerated phrases for inclusion within the religious tract.

3. The method of claim 1, wherein the subject matter variables are selected from the group consisting essentially of relationships, state of human condition, age

20   range, and social topics.

4. The method of claim 1, further comprising the step of adding an audio file to the religious tract.

5. The method of claim 1, further comprising the step of adding a hypertext link to the religious tract.

5   6. The method of claim 1, further comprising the step of adding a scripture verse to the religious tract.

7. A computer readable medium comprising software, said software comprising:

a text file comprising a plurality of phrases from which a religious tract may

10   be created; and

an interface, said interface adapted to

receive inputs from a sender about subject matter variables from which selected ones of said phrases are accessed in said text file;

display one or more religious tracts to said sender; and

15   email an assembled religious tract to a recipient through a network.

8. The computer readable medium of claim 7, further comprising a sender file for maintaining information regarding the sender.

20   9. The computer readable medium of claim 7, further comprising a recipient file for maintaining information regarding the recipient.

22

10. The computer readable medium of claim 7, further comprising an audio file for attaching an audio file to the religious tract.

11. The computer readable medium of claim 7, further comprising a scripture file for

5   including a scripture passage within the religious tract.

12. The computer readable medium of claim 7, further comprising attaching a bible hypertext link to the religious tract.

10   13. The computer readable medium of claim 7, further comprising including artwork within the religious tract.

14. A method of promoting religions, comprising:

hosting a web site with pregenerated religious tracts available thereon;

15   receiving inputs from a sender regarding subject matter that the sender

desires to convey to a recipient, one of said inputs comprising a relationship

between the sender and a recipient;

presenting one or more of said pregenerated religious tracts to said sender

based on the inputs;

20   receiving a request choosing one of the pregenerated religious tracts from

the sender; and

sending the selected pregenerated religious tract to the recipient indicated by

the sender.

15. The method of claim 14, wherein hosting a web site with pregenerated religious tracts comprises hosting a web site with a sender accessible interface.

5   16. The method of claim 15, wherein hosting a web site with the pregenerated religious tracts comprises hosting a web site with a plurality of data files accessible through said interface.

17. The method of claim 16, further comprising allowing a sender to customize the

10 selected pregenerated religious tract by accessing said data files and inserting data contained with said data files into the religious tract.

18. The method of claim 14, wherein the step of hosting the web site with the pregenerated religious tracts comprises hosting the web site at a local service

15 provider.

19. The method of claim 14, wherein the step of sending the selected pregenerated religious tract to the recipient comprises sending the recipient a message indicating the existence of the religious tract and allowing the recipient to access said sent

20 selected pregenerated religious tract on said web site.

20. The method of claim 19, further comprising soliciting information from said recipient upon said recipient accessing said selected pregenerated religious tract on said web site.

5 21. A method of generating interest in religion, comprising:

hosting a web site on a service provider computer, said service provider computer associated with a local religious organization;

providing an interface through said web site;

allowing a sender to access said interface;

10 receiving input from said sender;

generating a pregenerated religious tract for said sender in response to said input;

allowing said sender to edit said pregenerated religious tract; and

sending said religious tract to a recipient.

15

22. A method of creating an electronic religious tract comprising the steps of:

saving a plurality of different pregenerated religious phrases each classified according to at least one subject matter variable;

receiving input from a sender comprising one of the subject matter variables;

20 displaying to the sender a plurality of the pregenerated religious phrases classified according to the subject matter variable;

receiving a request from the sender choosing one of the pregenerated religious phrases; and

25

constructing the religious tract to include the chosen pregenerated religious

phrase.

23. A method of creating a database, comprising:

5   offering an opportunity for senders to send religious tracts to one or more

recipients;

sending the religious tracts to the one or more recipients;

after receipt by the recipients, querying the recipients for information; and

storing the information received from the recipients in the database.
